The StarTech.com Advantage:

Support and Resources: Single point of contact for all your questions; exclusive online tools and free live technical support

Save Time Sourcing: A complete selection of high-demand and hard-to-find products from one vendor

Best Value: StarTech.com products offer the best combination of features and price

Exclusive Resources: Complete product information and tools available at www.startech.com

PCI Post Diagnostics Test Card

StarTech ID: PCIPOST

The StarTech.com PCI Post Diagnostics Card makes troubleshooting PC problems easy. Simply plug the card into a PCI slot on a malfunctioning PC, and the card reports any problems in the form of error codes on it's LED display. These codes are then cross-referenced to the enclosed error code chart to pinpoint the cause of the problem. PC technicians and system builders can save hours of troubleshooting time and prevent non-defective parts from being replaced.

Note: You may have to refer to your motherboard manufacturer's manual for motherboard specific error diagnostic codes<p/>

Applications and Solutions

> An extremely valuable tool for PC service technicians
> Great for identifying faulty parts during system assembly

Features

> Easy to use - Simply plug it into a free PCI slot and turn on the computer to display the error code
> Includes a post code look-up table to provide a description of the problem
> Supports AMI, Award, and Phoenix BIOS POST error codes
